summary

- QA Tester with hands-on experience in testing mobile applications and computer games. I specialize in functional, regression, exploratory and usability testing, ensuring high product quality and a smooth user experience.
- On a daily basis, I work with Jira and X-Ray to manage test cases, track defects and support the development team throughout the software lifecycle. I am comfortable analyzing HTTP requests using browser DevTools and performing API testing with Postman, including JSON validation and status code verification.
- My technical foundation includes HTML, CSS, JavaScript (React), basic Python and SQL, which allows me to communicate effectively with developers and analyze issues beyond surface-level symptoms. I also use Git and GitHub for version control and collaborative development workflows.

education

2018 - 2022 / Technikum nr 8 im. Jana Karskiego w Zespole Szkół nr 42

- Field of Study: IT Technician
- Level: Secondary Education

Professional Certifications:

- EE.08 – Assembly and Maintenance of Computer Systems
- EE.09 – Programming and Web Application Development

languages

- Polish - Native
- English - B1 (comfortable reading technical documentation)

tools & technologies

- Jira / X-Ray – test management, bug tracking
- Postman – REST API testing
- DevTools – HTTP request and response analysis
- SQL – basic database queries
- Git / GitHub – version control and repository management
- HTML / CSS / JavaScript / React – understanding of web application structure
- Flutter – basic understanding of mobile app structure

work experience

Functional QA Tester

Lionbridge Poland Sp. z o.o. / September - present

- Conducted manual testing for mobile apps and console games, ensuring functionality, stability, and compliance with certification standards.
- Performed regression, smoke, exploratory and compatibility testing across multiple devices and environments.
- Reported, tracked and verified defects using Jira providing detailed reproduction steps and severity assessments.
- Developed and executed test cases and test plans, maintaining thorough documentation for repeatable testing processes.
- Conducted API testing with Postman and analyzed JSON responses and browser DevTools logs to identify issues.
- Collaborated with developers and QA analysts to resolve critical issues, verify fixes and optimize player experience.
- Monitored quality control procedures in Confluence, ensuring compliance with industry/project standards.
- Assisted in team coordination and management tasks, supporting task allocation and progress tracking.

core competencies

- Manual Testing: executing functional, regression, exploratory and usability tests
- Test Documentation: creating and maintaining test plans, test cases, checklists and bug reports
- API Testing: performing CRUD operations, validating JSON structures and checking HTTP responses
- SQL: writing basic queries, verifying data and performing database validation
- Mobile Testing: testing applications on iOS and Android devices
- Console Game Testing: conducting certification testing for console games
- Collaboration & Issue Management: coordinating with teams and managing defect triage
- Tools: proficient in Microsoft Office Suite
